2025 Global Trade and Investment Promotion Summit(Draft)

May 22, 2025, Fanghua Villa, Beijing Diaoyutai State Guest House

Summit Theme: Embracing the Era of Digital Intelligence, Collaborating for Shared Development

As artificial intelligence, quantum computing, blockchain, and other emerging technologies evolve at an unprecedented pace, the world is undergoing a profound transformation driven by digitalization and intelligence. The cross-border flow of data is giving rise to new forms of trade, while the rise of smart manufacturing is reshaping industry competition. These changes present fresh opportunities for international cooperation and sustainable development. “Embracing the Era of Digital Intelligence, Collaborating for Shared Development” is both a proactive response to this technological wave and a key to navigating global transformation. More importantly, it represents a strategic consensus for forging a new future. This summit aims to bring together leaders from government, business, and academia worldwide to strengthen mutual trust, explore collaboration opportunities, and seek common development through dialogue and exchange. Together, we seek to address global development challenges, promote technological innovation and resource sharing, and write a new chapter of prosperity in the digital intelligence era.

15:00-16:00 Opening Ceremony (Fanghua Hall)

- Mr. Ren Hongbin, Chairman of China Council for the Promotion of International Trade (CCPIT) presides over the ceremony and delivers the opening remarks
- Speech by Chinese Leader
- Speech by Leaders of international organizations and economic institutions
- Speech by the heads of multinational corporations

- Speech by the heads of Chinese companies
- Release of the *Beijing Initiative of Global Trade and Investment Promotion Summit 2025* by Mr. Ren Hongbin, Chairman of CCPIT

16:00-17:00 Plenary Session: Empowering Global Industrial and Supply Chains: Digital Intelligence for Security, Stability, and Collaboration (Fanghua Hall)

Digital intelligence technologies, integrating big data, cloud computing, and artificial intelligence, enable real-time data collection, analysis, and application across all segments of the supply chain. These technologies enhance transparency and traceability, playing a critical role in maintaining the stability and smooth flow of global industrial and supply chains. The plenary session will delve into how digital and intelligent solutions can empower industrial and supply chains, deepen international cooperation, and enhance resilience and security. Discussions will call on the global business community to leverage digital intelligence technologies to break down information barriers, foster collaborative innovation among upstream and downstream partners, and jointly create a global industrial and supply chain system that is more secure, stable, efficient, inclusive, open, and mutually beneficial.

Panelists:

- Mr. Ren Hongbin, Chairman, CCPIT
- Representatives of international organizations
- Representatives of Foreign Business Associations in China

17:10-18:10 Parallel Forums

Parallel Forum I: Digital Intelligence Driving an Open and Fair Innovation Ecosystem (Fanghua Hall)

Since early 2025, China's technological achievements have captured global attention: the launch of the homegrown AI model DeepSeek, the viral success of humanoid robots at the Spring Festival Gala, and the record-breaking performance of the AI-powered animated blockbuster "Nezha: The Demon Child Churns the Sea". As a key force in global innovation, China

remains committed to fostering an open and fair innovation ecosystem, promoting the integration and collaboration of innovation resources, creating an enabling environment for technological progress, and sharing innovation fruits with more countries. The forum will explore topics such as “AI + Future Industries”, the role of digital technologies in driving innovation ecosystems, and building an open, fair, and inclusive innovation ecosystem. It will present China’s vision for the era of digital intelligence and call on the global business community to enhance technological exchange, cooperation, and connectivity. Together, we can shape an innovation ecosystem that is open, fair, just, and non-discriminatory.

Panelists:

- Vice Chairman, CCPIT
- Representatives of global companies
- Representatives of Chinese companies

Parallel Forum II: Global Trade and Investment Cooperation in the Era of Digital Intelligence (Peony Hall A)

The rapid advancement of digital intelligence technologies is unlocking new opportunities worldwide, providing a crucial engine for economic growth and industrial upgrading. At the same time, the North-South divide is becoming more pronounced, with widening gaps in technology, digital access and AI . In the face of these emerging challenges, countries need to uphold openness and inclusiveness, accelerate digital intelligent transformation, empower high-quality international trade and investment cooperation, and collaborate to foster inclusive and for-all economic globalization so that we can share the dividends of development in this digital era. The forum will focus on strengthening cooperation in digital intelligence technologies, advancing trade and investment liberalization and facilitation, and bridging the digital divide. By upholding the principle of extensive consultation and joint contribution for shared benefit in global governance, it will explore pathways for mutually beneficial cooperation to usher economic globalization into a new phase that is more dynamic, inclusive and sustainable.

Panelists:

- Vice Chairman, CCPIT
- Representatives of international organizations
- Representatives of Foreign Business Associations
- Representatives of global companies

Parallel Forum III: Forging Bridges for China-U.S. Economic and Trade Cooperation in the New Era(Peony Hall C)

In an era of economic globalization, the interests and destinies of all countries are intertwined. China and the U.S., being the world's largest developing and developed nations respectively, share extensive common interests and broad space for cooperation. Only through “mutual success and common prosperity” can both nations “benefit their people and the world”. The business communities of both countries are staunch supporters and key contributors to bilateral relations. In the new era, both sides should further enhance mutual understanding, trust, and cooperation, anchor their partnership in shared interests, mitigate perception gaps through institutional dialogues, and continue to bolster China-US relations. The forum will focus on deepening institutional exchanges between the two business communities, and advancing green development, digital and intelligent technology cooperation. It will call upon the Chinese and U.S. business sectors to move toward each other, and work together for stable, healthy, and sustainable development of China-U.S. economic and trade relations, while injecting greater stability and certainty into global economic growth.

Panelists:

- Vice Chairman, CCPIT
- Representatives of US-China Business Council
- Representatives of US companies
- Representatives of Chinese companies
