Not shower, but Shower
Shower-head generation zero

 Mirable^{zero}
ULTRA FINE MIST®

Science I feel

Completely new concept of shower head.
Enjoy the unprecedented shower experience with our three
streams containing Ultra Fine Bubbles*.

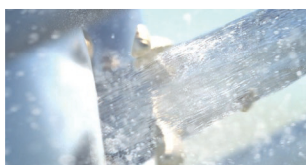

Still with the "Tornado Mist" and we add two new water streams

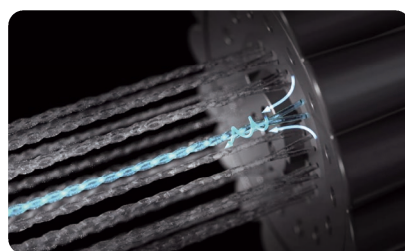

Ring Straight

Ring Straight flow has three hollowed out powerful streams that are suitable and effective for cleaning gaps. Enjoy the use of teeth cleaning and oral care while adjusting water pressure.

Cleaning Image

Ring flows are discharged from three holes that creates Ultra Fine Bubbles by involving airflow in the cavity. The plume of water has great cleaning power.

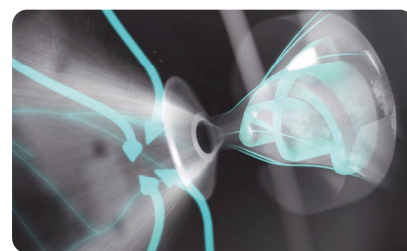

Splash Straight

Splash Straight flow for body cleaning, head spa and scalp care. Splash Straight shower cleans to the depths of the pore thoroughly making you feel more refreshed.

Cleaning Image

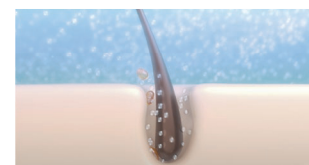

Two water flows collide after discharged and twisted water flow will be generated. The torsional flow creates Ultra Fine Bubbles that removes dirt easily.

Tornado Mist

Tornado Mist flow is perfect for facial cleaning. Mist with Ultra Fine Bubbles gives you smooth sensation on your skin and makes you feel that your skin glowing and being freshen.

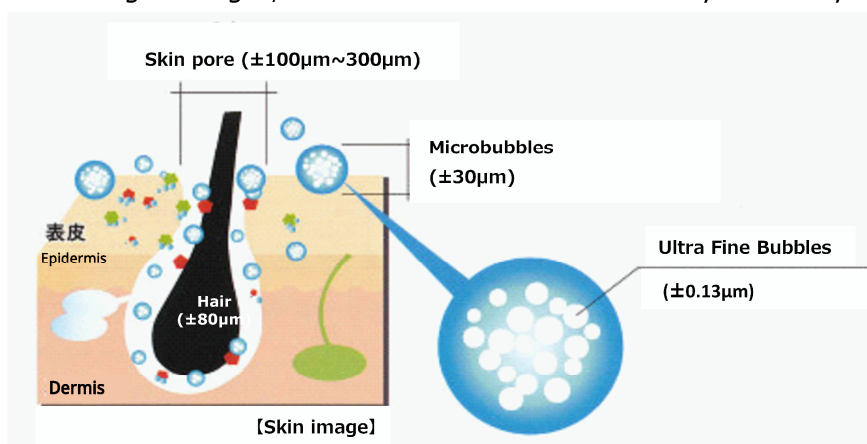

Cleaning Image

Ultra Fine Bubbles with excellent cleaning power are delivered into mist through 16 discharge holes. It also enables the water to discharge at stable hot water temperature.

*What is Ultra Fine Bubbles ?

A bubble which is under $1\mu\text{m}$ diameter is called "Ultra Fine Bubble". They are smaller than the wavelength of light, and are too small to be seen by naked eyes.

Mirable Zero mist contains 70 millions
Ultra Fine Bubbles in 1 cc.

1 cc
(1cm cube) = 70 millions
Ultra Fine
Bubbles

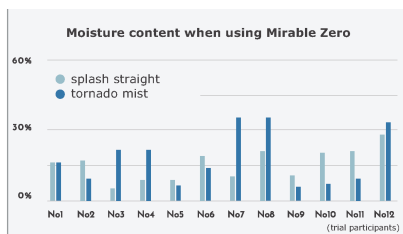

※ $1\mu = 1/1000\text{ mm}$

Measured by Microtrac BEL at FBIA experimental lab test

Ultra Fine Bubbles can rinse off clogging dirt and odor from your pores without using any chemicals or electric power, and it is safe for all ages.

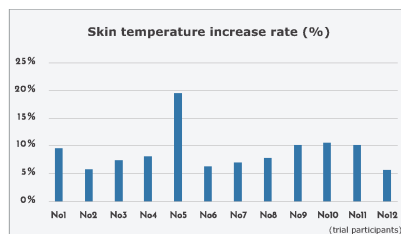

Moisturizer, steamy shower and water saving effect.

Skin Moisturizer

The data show that the moisture content of the skin increases compared to before use. Hot water from Mirable Zero penetrates deep into the skin easily and keeps the skin and hair moisturized for a long time, even after the shower.

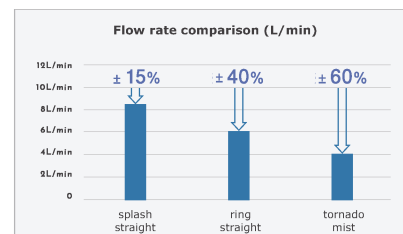

※ Water temperature: 37°C / Room temperature: 20°C / Humidity: 42% / 12 trial participants, using both splash straight water flow and tornado mist water flow were compared before and after 20 seconds of exposure to back of hand.

Steamy Shower

The data show that the percentage of skin surface temperature increase averages 9% after using the splash straight water flow. The water contains Ultra Fine Bubbles will give you a lasting feeling of warmth and relaxation.

※ Water temperature: 37°C / Room temperature: 24°C / Humidity: 42% / 12 trial participants after applying splash straight water flow to back of hand for 20 seconds, we measure the compare skin surface temperature before and after 5 minutes / splash straight 8.5L/min.

Water Saving

The data show that we have succeeded in saving about 15% in splash straight water flow, 40% in ring straight water flow, and 60% in tornado mist water flow. With the special feature "Air Mixing Systems", We succeed to coexist water saving and high pressure shower head at the same time.

※ Depending on the water pressure usage, the saving rate may change.

CaO3
Balls
(Calcium Sulfite)

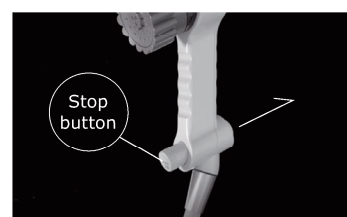

Tornado Stick included

The Calcium Sulfite filter reduces residual chlorine and increase the amount of Ultra Fine Bubbles to create amazing shower experience.

※ Patent No. 7053047

The filter effect lasts 2 to 3 months.
Replacement recommended each three months.

new feature

Convenient new feature with Stop Button

※ the STOP BUTTON doesn't completely cut off the water flow to prevent water hammer phenomenon.

Product information

Main part dimension	220 mm x 110 mm x 70φ x 350g
Thread dimension	G 1/2mm
Water supply pressure	0.15 ~ 0.3 MPa
Discharged amount	<ul style="list-style-type: none"> ● Ring Straight: 6L/min, Ultra fine bubbles 20million bubbles※ ● Splash Straight: 8.5L/min, Ultra fine bubbles 20million bubbles※ ● Mist shower: 4L/min, Ultra fine bubbles 30million bubbles※ <p>※based on finite difference method of submergence test.</p>
Material	Body: Polycarbonate, ABS, & POM Screw & Spring: Stainless Packing: EPDM
Tornado Stick (Chlorine Removal Cartridge)	Size: 72 mm x φ29mm; Material: Calcium Sulfite Body: Polycarbonate & ABS / Packing: EPDM
Manufactured by	Science

Easy Installation

Just take off your shower head and replace it with Mirable Zero. (Adaptor included)

Authorized Distributor :
Ogura Sundine Co.,Ltd.
