

## **“Shaken, Not Broken: A Structural Engineer’s Perspective on the Recent Earthquake”**

This special session will feature two distinguished speakers who will share their expertise on structural resilience, recent seismic events, and the future of safe urban development in Thailand.

### **Speaker 1: Mr. George Sinclair**

*Technical Director – Structures (ASEAN), Beca Thailand*

Mr. Sinclair brings extensive regional experience and a strong focus on seismic design and resilience. He will provide a broader perspective on the engineering response to recent events and how structural practices across ASEAN are evolving to meet emerging challenges.

### **Speaker 2: Mr. Weravat (Note) Tudthong**

*Managing Director , Beca Thailand*

A well-respected leader in Bangkok’s engineering community, Mr. Tudthong has over 23 years of experience and has contributed to many of the city’s landmark developments, such as One Bangkok, Cloud 11, Mercure-IBIS Siam, and The Lofts Asoke. His talk will delve into lessons from recent seismic activity and explore what resilience means for Thailand’s built environment.
